

Carmen Gyoh

Product Designer · Complex platforms & consumer products

Based in Nottingham & Basingstoke

I turn complex products into clear decisions and practical workflows. With 5+ years in design, I lead work from discovery through delivery and iteration, combining user research, systems thinking and close collaboration with engineers.

EXPERTISE

Product discovery & strategy

End-to-end journey design

Complex B2B workflows

Information architecture

Interaction & visual design

Design systems

Responsive, functional prototypes

User research, testing & synthesis

Workshop facilitation

Video creation & editing

Marketing, print & brand assets

Design hiring & interviewing

TOOLS & DELIVERY

Figma · Miro · Userlytics

Adobe Creative Suite · MUI

CapCut · Canva · Claude Code

Vercel · Google Cloud Platform

EDUCATION

BSc Medical Physiology

& Therapeutics

University of Nottingham

2018–2021 · 2:1 honours

UX/UI Design Training

Skillcrush · 2021

UX Design Foundation

Interaction Design Foundation

2019–2020

EXPERIENCE & OWNERSHIP

Product Designer · **Liberis** (Fintech)

January 2024–Present

Junior Product Designer · March 2022–December 2023

- Led end-to-end design for Flex, a new funding product, from account creation through launch. Evolved the journey through user testing with partner agents.
- Designed and shipped application tracking that helps partner agents see funding progress, blockers and next actions. The approach is now reused across workflows, with agents reporting clearer priorities.
- Translated Operations' evidence requirements into a document upload workflow. Post-launch feedback reported less chasing and more suitable submissions.
- Designed a multi-product funding journey from scratch without an existing reference. Developed competing concepts and tested with ten merchants across two rounds to establish the design direction.
- Shaped design systems across customer journeys, Partner Hub and internal tools, partnering with engineers through implementation.
- Supported wider teams with brand and marketing assets, including behaviours icons, one-pagers and merchandise designs.

Founder & Designer · **HerFreedom101**

October 2025–Present

- Owned product direction, design and delivery of a wellness app, using AI-assisted development to ship to Google Play and the App Store.
- Used early behaviour and qualitative feedback to replace a feature dashboard with an adaptive daily journey, connected guidance and progress that survives time away.

Clinical & freelance experience

2021–2022

- Worked in a pharmaceutical clinic after graduating in medical physiology and therapeutics, alongside freelance design (2021–2022).
- Freelance work included redesigning an author's website to support book discovery and purchase, and designing leaflets.
