

Carmen Gyoh

Product Designer · Fintech, platforms & consumer

Based in Nottingham & Basingstoke

I turn complex products into clear decisions and practical workflows. With 4+ years in fintech, I lead design from discovery through delivery and iteration, combining hands-on research, systems thinking and close collaboration with engineers.

EXPERTISE

Product discovery & strategy
Journey design & B2B workflows
Information architecture

Research planning & recruitment
User interviews & synthesis
Moderated & unmoderated testing
Concept testing & workshops

Interaction & visual design
Design systems
Responsive, functional prototypes

Video creation & editing
Marketing, print & brand assets
Design hiring & interviewing

TOOLS & DELIVERY

Figma · Miro · Userlytics
Adobe Creative Suite · MUI
CapCut · Canva · Claude Code
Vercel · Google Cloud Platform

Build functional prototypes with AI-assisted development and deploy to Vercel or Google Cloud.

EDUCATION

**BSc Medical Physiology
& Therapeutics**
University of Nottingham
2018–2021 · 2:1 honours

UX/UI Design Training
Skillcrush · 2021

UX Design Foundation
Interaction Design Foundation
2019–2020

EXPERIENCE & OWNERSHIP

Product Designer · Liberis (Fintech)

January 2024–Present

Junior Product Designer · March 2022–December 2023

- Led end-to-end design for Flex from account creation through launch, then evolved the funding journey using agent research and post-launch behaviour.
- Shipped Partner Hub Progress. Partner managers and agents reported clearer distinctions between blocking and optional actions.
- Designed document upload around Operations' requirements. Agents reported a more streamlined process; Operations reported less chasing and more suitable submissions.
- Designed and tested a multi-product funding journey with ten merchants across two rounds, combining direct comparison with optional guidance.
- Contributed to and shaped design systems for customer journeys, Partner Hub and internal tools, working with engineers through delivery.
- Plan and organise user research and testing, conduct interviews and contribute to design hiring.
- Create supporting brand and marketing assets, including Liberis behaviours icons, one-pagers, stickers and merchandise designs.

Founder & Designer · HerFreedom101

October 2025–Present

- Designed, built and shipped a women's wellness app to Google Play and the App Store using AI-assisted development.
- Used early behaviour and qualitative feedback to replace a feature dashboard with an adaptive daily journey, connected guidance and progress that survives time away.

Clinical & freelance experience

2021–2022

Worked in a pharmaceutical clinic after graduating in medical physiology and therapeutics, alongside freelance design.
